   a) If you don't already have an AWS Skill builder account, click *Create your Amazon account* and follow the prompts. You will receive a one-time email passcode (OTP). It may take longer with work emails, check you spam. If you receive a time-out error, select resend.

4. Once you have logged in, enter the Secret key: **718f373f-e306-4ad1-897f-075d2ef57130**

5. Need more help? Access our **FAQs**

Free digital AIML and Generative AI training on AWS Skill Builder

Advance your professional goals with access to 600+ free courses, gain experience in an AWS Management Console sandbox, explore game-based learning, take AWS Certification Official Practice Exams, and more.

For developer and technical audiences:

- [Amazon CodeWhisperer – Getting Started](#) is a free, self-paced digital course introducing learners to Amazon CodeWhisperer, an artificial intelligence coding companion designed to help developers get more done, faster. Learners are taught its capabilities, how to set it up, and begin using it in their coding programming language of choice.

- [Machine Learning Learning Plan](#) is a free learning plan designed to help Data Scientists and Developers integrate machine learning and artificial intelligence into tools and applications. This Learning Plan will expose you to the broadest and deepest set of services and supporting cloud infrastructure, and can help prepare you for the [AWS Certified Machine Learning - Specialty](#) certification exam.

For business and non-technical audiences:

- [Generative AI for Executives](#) is a collection of free, brief, and easy-to-understand videos to help C-suite executives understand how generative AI can help address their business challenges and drive business growth.
